

WHAT IS A VIRUS?

WHERE DID THE CORONAVIRUS COME FROM?
HOW DOES IT "MAKE" ITSELF (MULTIPLY)?

TO FIND OUT
FOLLOW
THE SECRET MAP

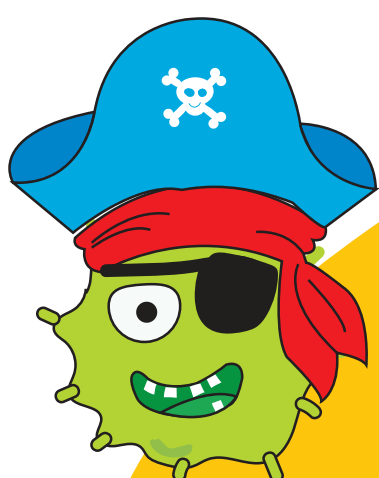

新冠病毒

THE CORONA VIRUS
WAS FIRST
DISCOVERED IN CHINA

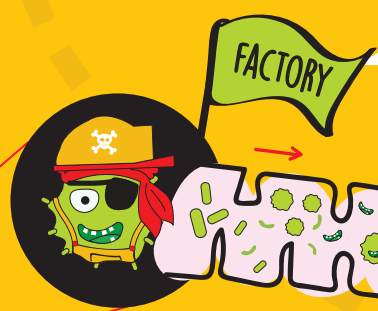

IT SEEMS IT CAME FROM THE BATS,
BECAME STRONGER AND STARTED
TO ATTACK HUMANS

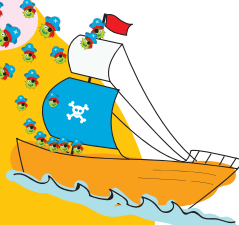

BUT WHAT
IS A VIRUS?

A VIRUS IS LIKE
A TINY PIRATE

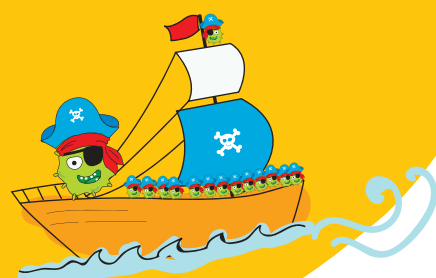

IT GETS ABOARD SOMEONE
AND IT CAN ATTACK OUR BODY,
USE THE SUPPLIES AND FACTORIES
OF THE PERSONS' CELLS TO BUILD
AN ARMY OF TINY PIRATES

WHEN TOO MANY PIRATES
ARE INVADING OUR BODY –
WE GET SICK...

..AND IF WE DO NOT COVER OUR MOUTH
WHEN WE COUGH, OR OUR NOSE
WHEN WE SNEEZE, THE PIRATES
MAY INVADE OTHER PEOPLE, TOO!

ONBOARD A PERSON,
THE PIRATES CAN TRAVEL
THE WORLD...

...AND SEND PIRATES
EVERYWHERE!

...SO WHAT SHOULD WE DO
NOT TO GET SICK?
