

WHAT SHAPE, COLOR AND SIZE IS THE CORONAVIRUS?

TO FIND OUT FOLLOW THE SECRET MAP

THE CORONAVIRUS HAS A BIT OF A SUN OR CROWN SHAPE, IT IS ROUNDED, WITH KIND OF SMALL SPIKES ALL AROUND. THIS IS WHERE ITS NAME COMES FROM! CORONAVIRUS MEANS "CROWN VIRUS"

IT IS VERY VERY VERY SMALL. TO GIVE YOU AN IDEA, A GRAIN OF SAND IS ABOUT 10,000 TIMES LARGER THAN THE CORONAVIRUS

AND... WHAT COLOR IS IT THEN?

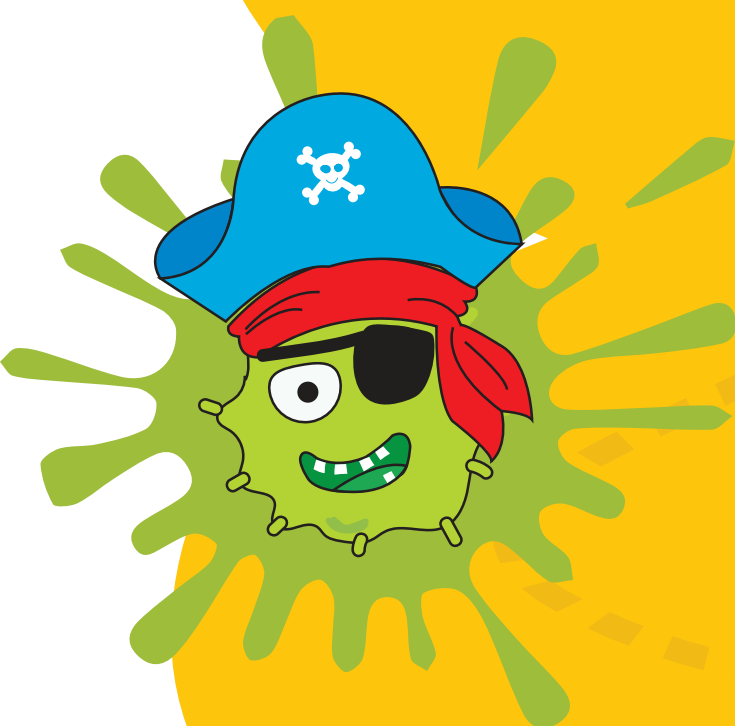

THIS IS A VERY GOOD QUESTION. ACTUALLY, THE CORONAVIRUS IS SOOO SMALL THAT IT IS IMPOSSIBLE TO SEE WHAT COLOR IT IS

TO FIND OUT, YOU WOULD HAVE TO LOOK AT A LARGE PILE OF CORONAVIRUS UNDER THE MICROSCOPE. BUT IT IS NOT CERTAIN THAT SOMEONE HAS ALREADY TRIED!

AS FOR THE COLORS THAT WE SEE IN THE PHOTOS ON THE INTERNET, THESE ARE ALL COLORS USED BY SCIENTISTS TO "PAINT THE VIRUS" TO BETTER SEE IT

WE LIKED OUR PIRATE GREEN AND YOU, WHAT IS YOUR "PIRATE'S COLOR"? SHARE YOUR OWN PIRATES ON #LIHTELLMEWHY

...AND WHAT DOES IT EAT?
